# Hospitality Solutions

## Hospitality TV

Our TV allows hoteliers to offer a personalised viewing experience by connecting their guest room TV sets to their IP network, without any extra cabling.

## Cast to TV

Enhance the guest experience by letting your guests cast their own content onto the hotel TV simply by using their favourite apps on their device.

## Digital Signage

We are able to incorporate various digital signage solutions into our IPTV systems, eliminating the need for multiple suppliers and delivering integrated and secure experiences.

## Digital Headends

Our Digital head-end technology offers a limitless amount of available channels that can be broadcasted to an unlimited amount of TV units.

## Internet Access

Addressing the needs of an increasingly connected world and the demand for strong, reliable Wifi, our solution was built specifically with the Hospitality industry in mind.

## Conference Tools

Our Conference Tool provides full control over your meeting spaces, while allowing you to set up a conference network and customised access codes with just a few clicks.

## Managed Networks

Our network engineers will ensure the property's infrastructure is of a world-class level, meeting the current and future needs to complement the solutions offered.

## Electronic Locks

RFID technology embedded in our lock allows you to provide a secure and reliable solution while giving guests a more comfortable and pleasant stay. It is compatible with our Mobile Key Solution.

Benefit from a bespoke VOD solution tailored around your business. Technology does not have to break the bank, it just needs to be strategic, smart and most importantly scalable. Financing and rental options are available, contact us to learn more.

## Our Partners

# Business Solutions

Transform your business and customer experience through high-speed, robust and reliable networks and Wifi. We take care of every detail so that you can run your businesses efficiently through our VOD Business Solutions.

VOD provides business-class performance, managed from the cloud for faster deployment, simplified administration, and richer visibility.

## Centralized Management

Seamlessly manage campus-wide Wifi deployments and distributed multisite networks from a single pane of glass.

## Application Visibility and Control

Identify which applications are being used, and then prioritize critical apps while limiting recreational apps.

## Automatic RF Optimisation

Automatically optimises Wifi by measuring channel utilisation, signal strength, throughput, and interference.

## Identity-Based Firewall

Automatically assigns firewall and traffic shaping rules, VLAN tags, and bandwidth limits to enforce the right policies for each class of user.

## Location Analytics

Reveal powerful metrics such as visitor capture rate, user visit time, and repeat visits by listening for wireless devices.
